

Starting and stopping scripts:

Double click the .exe to run. Nothing will appear to happen, but it will have started. After the script starts, there are icons for each hidden in your dock in your taskbar. Right click on the icon and hit "Exit" to stop script.

Start Hotkey program automatically at startup:

- 1) Save the .exe wherever you are going to keep it.
- 2) Hit "windows" key and type "run" and hit enter.
- 3) Type: "shell:startup" in the window and hit OK.

- 4) This will open file explorer at some location like:
"C:\Users\gfrey\AppData\Roaming\Microsoft\Windows\Start Menu\Programs\Startup".
- 5) Create a shortcut from the .exe and drop it in that folder and it will start at startup for you.
